Chief Executive's Statement

We are pleased to report that the business has returned to profit following a disappointing second half in 2010. For the six months ended 31 March 2011 the business generated operating revenue of £26.5m (2010: £31.3m) and adjusted profit before tax of £4.1m (2010: £9.4m). In addition, there were £0.1m of gains (2010: £1.3m gains) recognised on investments held outside of our market making business and £4.2m of charges (2010: £4.6m charges) relating to employee share scheme arrangements. A reconciliation of the adjusted profit to the statutory result is set out in note 2.

Following the slower market conditions experienced during the second half of our 2010 financial year, the equity markets experienced a buoyant start to 2011. Equity indices rebounded strongly with the FTSE 100 up 6.5%, FTSE 250 up 10.1% and AIM up 15.1%. However, the marked slowdown in equity fund raising on the London Stock Exchange seen in the second half of 2010 has not abated with equity funds raised on AIM and the Main Market combined totalling £17.2bn during the first half of 2011 compared to £25.6bn during the first half of 2010.

These market conditions were broadly reflected in our revenue performance whereby combined institutional commission & trading revenues had a record first quarter and ended the first half at £17.2m (2010: £13.6m). Income from corporate and issuance transactions for the period was £6.7m (2010: £15.4m) although a further 7 transactions have been announced in April.

Our balance sheet remains robust with cash and cash collateral balances totalling £40.7m (September 2010: £58.2m) while net assets have reduced to £101.3m (September 2010: £106.7m). Cash outflows during the period largely reflect the purchase of shares into the Group's Employee Benefit Trust, the payment of our 2010 final dividend and increased investment in our trading book partially offset by the monetisation of two of our unquoted investments. The combined impact of these actions resulted in cash outflows of £14.6m.

During the six months ended 31 March 2011 we took the opportunity to monetise holdings within our investment portfolio. With net cash realisation of £4.7m, the portfolio is valued at £15.4m (September 2010: £20.3m) the majority of which comprises holdings in quoted companies. Overall, this portfolio experienced fair value losses of £0.2m offset by dividend receipts of £0.3m resulting in a net gain of £0.1m reported through the other operating income line of the income statement.

Chief Executive's Statement continued

Corporate Finance & Corporate Broking
Notable deals include IPOs for Betfair and CatCo, equity issues for Fiberweb and Accsys Technologies and advising Brit Insurance and NR Nordic on their recent takeovers. In total we completed 9 (2H 2010: 7, 1H 2010: 18) equity issuance transactions and since 31 March 2011 a further 5 have been announced.

We continue to attract high quality corporate clients with 17 new clients added during the period bringing the total number for whom we act to 138 companies (September 2010: 133). We continue to focus our efforts across a broad range of corporate clients which include 53 FTSE Small Caps, 26 FTSE250 clients and one FTSE100 company. The offering to our corporate clients includes access to worldwide institutional investors, but also to a network of over 1,500 private client fund managers who manage c. £340bn of discretionary funds providing alternative sources of liquidity and investor interaction.

The strength of our dedicated corporate broking team was instrumental in Numis being voted #1 in both UK Mid Cap Corporate Broking and UK Small Cap Corporate Access in the 2010 Thomson Reuters Extel survey as well as #2 UK Smallcap Brokerage firm and #3 Leading UK Brokerage firm. Numis has been voted Leading Brokerage Firm or runner up in the Thomson Reuters Extel survey (for UK companies of up to £1bn market capitalisation) in each of the last 4 years.

Research & Execution
Our research and execution services are recognised as being exceptional and have enabled us to maintain an increased market share throughout the period with FTSE 250 market share averaging 3.2% (2H 2010: 2.2%) and FTSE Small Cap market share averaging 7.7% (2H 2010: 5.9%).

Our research teams were ranked in the top three in five of the fifteen sectors that we cover. Our highly rated analysts produce research on over 400 companies (including coverage of over 40 FTSE 100 stocks and over 130 FTSE 250 stocks) and we have a recognised capability in fifteen sectors. External recognition has been achieved in the Starmine FTSE250 Best Recommendations in which Numis has been ranked number one in three of the last four years.

Our execution services, across an increasing range of 'lit' and 'dark' trading venues, continue to make a major contribution to the development of our reputation, the resilience of our institutional commissions and the sustained improvements in market share, particularly in FTSE 250 stocks. Indeed, our trading and execution services were voted #1 for both UK Small Cap and UK Mid Cap in the 2010 Thomson Reuters Extel survey.

Sales and Trading is an increasingly competitive area with pressure on commission levels for trades in liquid stocks from electronic trading. However, our clients have a strong demand for well-researched ideas combined with high quality execution and we believe our platform is well placed to improve performance for our 450+ active institutional clients across the UK, Europe and the USA. Our US office continues to provide an excellent service arranging road shows in the USA for FTSE250 companies which is an important and valuable service as US investors represent a growing proportion of the FTSE250 share registers.

Dividend and Scrip Alternative

In light of our robust capital position coupled with a strong pipeline, the Board approved the payment of an interim dividend of 4.00p per share (2010: interim 4.00p per share, total 8.00p per share). The dividend will be payable on 1 July 2011 to all shareholders on the register at 13 May 2011. Shareholders will be offered the option to receive shares instead of a cash dividend.

Litigation

As noted in our market announcement on 31 August 2010 and subsequently in our 2010 annual report and accounts, Numis was served notice of a legal claim in relation to a private placing in 2007 in respect of Rock Well Petroleum Inc. Since the publication of the 2010 annual report and accounts, the legal process has progressed and, as required by that process, disclosure of documents has been made between Numis and the claimants. Having progressed to this stage, and after taking further legal advice based on review of the disclosed documents, the directors remain of the opinion that the allegations are entirely spurious and unfounded and continue to defend the claim vigorously. Consequently there is no provision in the financial information for future costs associated with or emanating from this claim.

Outlook

The beginning of the second half has seen a significant increase in client activity with 7 deals announced during April. Numis continues to build its franchise, attracting more high quality corporate clients who see the benefit of working with an independent adviser who has focus and presence in the market.

With the support of all of our stakeholders Numis can thrive in the current competitive environment through a mixture of innovation and excellence in everything we do. We will continue to build the company by attracting high quality individuals and teams whilst having a greater focus on profitability and generating shareholder value.

Notes to the Financial Statements

1. Basis of preparation

The consolidated financial information contained within these financial statements is unaudited and does not constitute statutory accounts within the meaning of Section 434 of the Companies Act 2006. These financial statements have been prepared in accordance with AIM Rule 18. The statutory accounts for the year ended 30 September 2010, which were prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU) and in accordance with International Financial Reporting Interpretations Committee (IFRIC) interpretations and with those parts of the Companies Act 2006 applicable to companies reporting under IFRS, have been delivered to the Registrar of Companies. The report of the independent auditor on those statutory accounts contained no qualification or statement under Section 498(2) or (3) of the Companies Act 2006.

The preparation of these interim financial statements requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The significant judgements and estimates applied by the Group in these interim financial statements have been applied on a consistent basis with the statutory accounts for the year ended 30 September 2010. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those of estimates.

These interim financial statements are prepared on a going concern basis as the directors have satisfied themselves that, at the time of approving these interim financial statements, the Group has adequate resources to continue in operational existence for at least the next twelve months.

The accounting policies applied in these interim financial statements are the same as those published in the Group's statutory accounts for the year ended 30 September 2010.

3. Segmental reporting

Geographical information
The Group is managed as an integrated investment banking business and although there are different revenue types (which are separately disclosed in note 4) the nature of the Group's activities is considered to be subject to the same and/or similar economic characteristics. Consequently the Group is managed as a single business unit, namely investment banking.

The Group earns its revenue in the following geographical locations:

	6 months ended 31 March 2011 Unaudited £'000	6 months ended 31 March 2010 Unaudited £'000	Year ended 30 September 2010 Audited £'000

United States	2,574	2,567	5,367
	26,475	31,278	51,940

There are no customers which account for more than 10% of revenues in the six month period ended 31 March 2011, the six month period ended 31 March 2010 or the year ended 30 September 2010.

The following is an analysis of the carrying amount of non-current assets (excluding financial instruments and deferred tax assets) by the geographical area in which the assets are located:

Non-staff costs	10,360	8,553	18,316
	26,760	27,151	52,473

The major constituents of non-staff costs comprise our technology platform, premises costs and expenses incurred through brokerage, clearing and exchange fees. The overall run rate for non- staff costs is broadly in-line with the second half of 2010, albeit with some upward pressures arising from increased broker-to-broker trading activity, the rise in the standard rate of VAT and certain corporate legal costs.

Staff costs include share scheme related charges and incentive payment accruals and therefore are particularly sensitive to movements in these two items.

6. Finance income

Notes to the Financial Statements

7. (Loss) / earnings per share

Basic (loss) / earnings per share is calculated on loss after tax of £805,000 (2010: £4,877,000 profit) and 101,429,079 (2010: 102,738,919) ordinary shares being the weighted average number of ordinary shares in issue during the period. Diluted (loss)/earnings per share takes account of contingently issuable shares arising from share scheme award arrangements where their impact would be dilutive. In accordance with IAS 33, potential ordinary shares are only considered dilutive when their conversion would decrease the profit per share or increase the loss per share from continuing operations attributable to the equity holders. Therefore shares that may be considered dilutive while positive earnings are being reported may not be dilutive while losses are incurred.

The calculations exclude shares held by the Employee Benefit Trust on behalf of the Group.

	6 months ended 31 March 2011 Unaudited Number Thousands	6 months ended 31 March 2010 Unaudited Number Thousands	Year ended 30 September 2010 Audited Number Thousands
Weighted average number of ordinary shares in issue during the period – basic	101,429	102,739	102,771
Dilutive effect of share awards	7,641	5,450	7,992
Diluted number of ordinary shares	109,070	108,189	110,763

For the 6 month period ended 31 March 2011 and the year ended 30 September 2010 there were no potential ordinary shares whose conversion would have resulted in an increase in the basic loss per share. The table above shows the diluted number of ordinary shares that would have been appropriate if the Group had reported a profit after tax in those periods.

During the period the Company issued and allotted nil (2010: Nil) new ordinary shares.

9. Balance sheet items

(a) Deferred tax

As at 31 March 2011 deferred tax assets totalling £2,122,000 (30 September 2010 £2,799,000) have been recognised reflecting managements' confidence that there will be sufficient levels of future taxable gains against which these deferred tax asset can be utilised. The deferred tax asset principally comprises amounts in respect of share based payments.

(b) Trade and other receivables and Trade and other payables

Trade and other receivables and Trade and other payables principally comprise amounts due from and due to clients, brokers and other counterparties. Such amounts represent unsettled sold and unsettled purchased securities transactions and are stated gross. The magnitude of these balances does vary with the level of business being transacted around the reporting date. Included within Trade and other receivables are cash collateral balances held with securities clearing houses of £4,507,000 (30 September 2010: £2,811,000).

(c) Trading investments

Included within trading investments is £15,412,000 (30 September 2010: £19,250,000) of investments held outside of the market making portfolio. The reduction in the carrying value of these investments during the six month period ended 31 March 2011 is primarily due to the liquidation of certain investments. As at 31 March 2011, £2,500,000 (30 September 2010: £5,069,000) of trading investments had been pledged to certain institutions under stock lending arrangements.

(d) Stock borrowing / lending collateral

The Group enters stock borrowing and lending arrangements with certain institutions which are entered into on a collateralised basis with securities or cash advanced or received as collateral. Under such arrangements a security is purchased or sold with a commitment to return it at a future date at an agreed price. The securities purchased are not recognised on the balance sheet whereas the securities sold remain on the balance sheet with the transaction treated as a secured loan made for the purchase or sale price. Where cash has been used to affect the purchase or sale, an asset or liability is recorded on the balance sheet as stock borrowing or lending collateral at the amount of cash collateral advanced or received.

Where trading investments have been pledged as security these remain within trading investments and the value of security pledged disclosed separately except in the case of short-term highly liquid assets with an original maturity of 3 months or less, which are reported within cash and cash equivalents with the value of security pledged disclosed separately.

10. Reconciliation of operating (loss) / profit to net cash (used in) / from operating activities

	6 months ended 31 March 2011 Unaudited £"000	6 months ended 31 March 2010 Unaudited £"000	Year ended 30 September 2010 Audited £"000
